# SESIÓN 7

## Citas bibliográficas

- Citas bibliográficas

## Entorno thebibliography

Para utilizar el entorno thebibliography se deben poner las referencias entre los comandos `\begin{thebibliography}{99}` . . . `\end{thebibliography}`. Cada una de las entradas de la bibliografía se pone con un comando `\bibitem{llave}`, la llave se utiliza para hacer la referencia dentro del texto.

```
\begin{thebibliography}{99}
\bibitem{Goossens} M. Goossens; F. Mittelbach; A. Samarin.
                  {\it The \LaTeX Companion}. Addison-Wesley. 1993.
\bibitem{Lamport} L. Lamport. {\it \LaTeX}. Addison-Wesley. 1996.
\end{thebibliography}
```

- [1] M. Goossens; F. Mittelbach; A. Samarin. *The  $\LaTeX$  Companion*. Addison-Wesley. 1993.
- [2] L. Lamport.  *$\LaTeX$* . Addison-Wesley. 1996.

Tanto `\cite{Goossens}` y `\cite{Lamport}` y otros ejemplos son del uso de la bibliografía.

Tanto [1] y [2] y otros ejemplos son del uso de la bibliografía.

 Trabalho de Conclusão de Curso. Turma 2022.  
 Data da Defesa xx/xx/2023

## Título xxxx xxxxx xxxxx xxxxx xxxxx

**FIRST A. AUTHOR<sup>1</sup>, (Fellow, IEEE), SECOND B. AUTHOR<sup>2</sup>, AND THIRD C. AUTHOR, JR.<sup>3</sup>, (Member, IEEE)**  
<sup>1</sup>National Institute of Standards and Technology, Boulder, CO 80305 USA (e-mail: author@boulder.nist.gov)  
<sup>2</sup>Department of Physics, Colorado State University, Fort Collins, CO 80523 USA (e-mail: author@lerna.colostate.edu)  
<sup>3</sup>Electrical Engineering Department, University of Colorado, Boulder, CO 80309 USA  
Corresponding author: First A. Author (e-mail: author@boulder.nist.gov).

This paragraph of the first footnote will contain support information, including sponsor and financial support acknowledgment. For example, "This work was supported in part by the U.S. Department of Commerce under Grant BS123456."

**RESUMO** These instructions give you guidelines for preparing papers for IEEE Access. Use this document as a template if you are using  $\text{\LaTeX}$ . Otherwise, use this document as an instruction set. The electronic file of your paper will be formatted further at IEEE. Paper titles should be written in uppercase and lowercase letters, not all uppercase. Avoid writing long formulas with subscripts in the title; short formulas that identify the elements are fine (e.g., "Nd-Fe-B"). Do not write "(Invited)" in the title. Full names of authors are preferred in the author field, but are not required. Put a space between authors' initials. The abstract must be a concise yet comprehensive reflection of what is in your article. In particular, the abstract must be self-contained, without abbreviations, footnotes, or references. It should be a microcosm of the full article. The abstract must be between 150–250 words. Be sure that you adhere to these limits; otherwise, you will need to edit your abstract accordingly. The abstract must be written as one paragraph, and should not contain displayed mathematical equations or tabular material. The abstract should include three or four different keywords or phrases, as this will help readers to find it. It is important to avoid over-repetition of such phrases as this can result in a page being rejected by search engines. Ensure that your abstract reads well and is grammatically correct.

**PALAVRAS-CHAVE** Enter key words or phrases in alphabetical order, separated by commas. For a list of suggested keywords, send a blank e-mail to [keywords@ieee.org](mailto:keywords@ieee.org) or visit [http://www.ieee.org/organizations/pubs/ani\\_prod/keyword98.txt](http://www.ieee.org/organizations/pubs/ani_prod/keyword98.txt)

**I. INTRODUÇÃO**

THIS document is a template for  $\text{\LaTeX}$ . If you are reading paper is intended for a conference, please observe the conference page limits.

Abstract

The official Springer Nature authoring template for LaTeX submissions. The template takes a content first approach with minimal formatting. It is designed to promote editorial policy best practice and contains options to help authors meet journal-level requirements. Latest update: December 2023.

Article Title

First Author<sup>1,2\*</sup>, Second Author<sup>2,3†</sup> and Third Author<sup>1,2†</sup>

<sup>1\*</sup>Department, Organization, Street, City, 100190, State, Country.  
<sup>2</sup>Department, Organization, Street, City, 10587, State, Country.  
<sup>3</sup>Department, Organization, Street, City, 610101, State, Country.

\*Corresponding author(s). E-mail(s): [iauthor@gmail.com](mailto:iauthor@gmail.com);  
 Contributing authors: [iauthor@gmail.com](mailto:iauthor@gmail.com); [iiianthor@gmail.com](mailto:iiianthor@gmail.com);  
<sup>†</sup>These authors contributed equally to this work.

Abstract

The abstract serves both as a general introduction to the topic and as a brief, non-technical summary of the main results and their implications. Authors are advised to check the author instructions for the journal they are submitting to for word limits and if structural elements like subheadings, citations, or equations are permitted.

**Keywords:** keyword1, Keyword2, Keyword3, Keyword4

1 Introduction

The Introduction section, of referenced text [1] expands on the background of the work (some overlap with the Abstract is acceptable). The introduction should not include subheadings.

Springer Nature does not impose a strict layout as standard however authors are advised to check the individual requirements for the journal they are planning to submit to as there may be journal-level preferences. When preparing your text please also be aware that some stylistic choices are not supported in full text XML (publication version), including coloured font. These will not be replicated in the typeset article if

**Abstract**—This document is a model and instructions for  $\text{\LaTeX}$ . This and the `IEEEtran.cls` file define the components of your paper [title, text, heads, etc.]. **\*CRITICAL: Do Not Use Symbols, Special Characters, Footnotes, or Math in Paper Title or Abstract.**

**Index Terms**—component, formatting, style, styling, insert

**I. INTRODUCTION**

This document is a model and instructions for  $\text{\LaTeX}$ . Please observe the conference page limits.

**II. EASE OF USE**

*A. Maintaining the Integrity of the Specifications*

The `IEEEtran` class file is used to format your paper and style the text. All margins, column widths, line spaces, and text fonts are prescribed; please do not alter them. You may note peculiarities. For example, the head margin measures proportionately more than is customary. This measurement and others are deliberate, using specifications that anticipate your paper as one part of the entire proceedings, and not as an independent document. Please do not revise any of the current designations.

*A. Abbreviations and Acronyms*

Define abbreviations and acronyms the first time they are used in the text, even after they have been defined in the abstract. Abbreviations such as IEEE, SI, MKS, CGS, ac, dc, and rms do not have to be defined. Do not use abbreviations in the title or heads unless they are unavoidable.

*B. Units*

- Use either SI (MKS) or CGS as primary units. (SI units are encouraged.) English units may be used as secondary units (in parentheses). An exception would be the use of English units as identifiers in trade, such as "3.5-inch disk drive".
- Avoid combining SI and CGS units, such as current in amperes and magnetic field in oersteds. This often leads to confusion because equations do not balance dimensionally. If you must use mixed units, clearly state the units for each quantity that you use in an equation.
- Do not mix complete spellings and abbreviations of units: "Wb/m<sup>2</sup>" or "webers per square meter", not "webers/m<sup>2</sup>". Spell out units when they appear in text: "... a few henries"; not "... a few H".
- Use a zero before decimal points: "0.25", not ".25". Use "cm<sup>3</sup>", not "cc".)

Title of paper

Author name<sup>1</sup>

<sup>1</sup>University of the Moon, Earth, . .

Abstract

Abstract example for the Results in Physics Journal. Here you provide a brief summary of the research and the results.

Keywords: keyword 1, keyword 2, keyword 3, keyword 4

1. Introduction

Here is where you provide an introduction to work and some background. For example building on previous work of image enhancement in optical astronomy (Vojtekova et al., 2021). Sweere et al. (2022) developed a method to improve the resolution of X-ray images from XMM-Newton to provide similar spatial resolution to Chandra.

2. Title 2

Lorem ipsum dolor sit amet, consectetur adipiscing elit. Ut purus elit, vestibulum ut, placerat ac, adipiscing vitae, felis. Curabitur dictum gravida mauris. Nam arcu libero, nonummy eget, consectetur id, vulputate a, magna. Donec vehicula augue eu neque. Pellentesque habitant morbi tristique senectus et netus et malesuada fames ac turpis egestas. Mauris ut leo. Cras viverra metus rhoncus sem. Nulla et lectus vestibulum urna fringilla ultrices. Phasellus eu tellus sit amet tortor gravida placerat. Integer sapien est, iaculis in, pretium quis, viverra ac, nunc. Praesent eget sem vel leo ultrices bibendum. Aenean faucibus. Morbi dolor nulla, malesuada eu, pulvinar at, mollis ac, nulla. Curabitur auctor semper nulla. Donec varius orci eget risus. Duis nibh mi, congue eu, accumsan eleifend, sagittis quis, diam. Duis eget orci sit amet orci dignissim rutrum.

Figure 1: Results in Physics Journal cover

3.1. Subsection title

Nulla malesuada porttitor diam. Donec felis erat, congue non, volutpat at, tincidunt tristique, libero. Vivamus viverra fermentum felis. Donec nonummy rhoncus nunc. Phasellus
